# We believe the nonprofit world also deserves access to game-changing technology

---

If you're a nonprofit, you've likely come up against one or more of the following challenges:

1. Shortage of funds
2. Shortage of time
3. Shortage of human resources

IT solutions exist to address these problems, but they can be time-consuming, expensive, skill-based, and difficult, particularly if you don't have great IT help.

## CoreTech Foundation builds technology solutions for organizations committed to making the world a better place

We've created a technology toolbox to help nonprofits achieve their purpose more affordably and efficiently.

CoreTech provides nonprofits with a two-fold solution:

1. Software development
2. Consulting Services

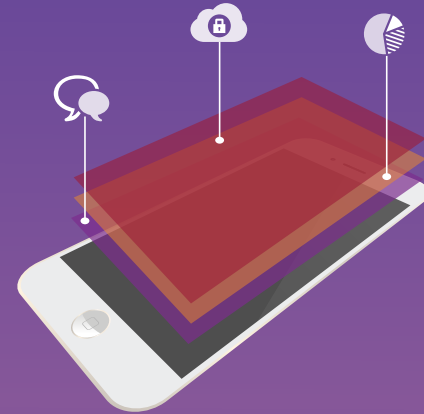

## Software Development

1

We've created a technology toolbox to address basic organizational needs. We call this toolbox CORE.

Our CORE software allows you to:

- collect, analyze, and manage data of any size
- measure data against funders' measurement standards
- develop engaging fundraising and awareness platforms
- maximize follow-up engagement with donors
- monitor and report on progress
- seamlessly communicate with internal and external stakeholders
- develop existing and innovative mobile applications

## Consulting Services

2

### CTO as a Service

Get the expertise of a CTO without having to hire a full-time IT professional.

### Consulting Services

We work with you to build and implement custom solutions quickly and affordably.

Our mission is to become the #1 software provider and technology consultants for charities worldwide

## Who does CoreTech benefit?

### Nonprofits looking for IT help

A lot of nonprofits lack technical expertise. We help them understand and implement technology, so they can transform their ideas into a sustainable reality

### IT professionals looking to contribute

CoreTech offers a rare opportunity for smart, driven IT professionals to give back to the world. We offer a variety of ways for developers, project managers, and CTOs to contribute their time to help nonprofits make a positive impact

### Donors passionate about supporting a meaningful cause

Looking to make a difference? CoreTech accepts donations. Choose to contribute to a project that speaks to you, or make a general donation. 100% of the proceeds are invested into sustainable technology solutions that empower the world's non-profits

# Project Initiatives

**Project Liquid**

## Creating a new entrepreneurial ecosystem around clean water

CoreTech's Project LiQuid addresses the global water crisis by giving the world's poor and marginalized people access to clean water. At its core, LiQuid is a mobile application and service ecosystem that connects end consumers to clean water, produced by water purification systems

**Project Prime**

## Developing social engagement and fundraising around STEM (Science, Technology, Engineering, and Math)

Project Prime is a social engagement and fundraising platform built to connect and inspire young people around STEM (Science, Technology, Engineering, and Math) projects. We partner with organizations committed to STEM initiatives, providing them with a platform to achieve social engagement and non-profit fundraising

**Project Shell**

## Enabling 27,000 seriously ill children per year to have a comfortable camp experience

CoreTech developed Shell as a software solution to provide a seamless experience for campers, parents, staff, and onsite medical personnel. They can now access quick and easy registration, secure data entry and storage, and a notification system communicating key medical information in real-time
